Lunch & Learn

Marc Gagné
Senior Developer Evangelist
Cloud

Wednesday | Feb 12th | 11:30am-1:30pm

Fishbowl - DC 1301

You may have heard about Windows Azure (you know Microsoft's cloud offering) but wrote it off because you don't do .NET or even use Windows. Well in this lunch and learn you'll see how wrong you are. Windows Azure has support for Node.js, php, python, Linux VMs and more. You'll be shown quick and practical demos on using git to deploy your sites, how to setup a Linux VMs with SSH key authentication and more. You'll also learn about BizSpark, a program from Microsoft for all tech startups that includes free software, $150 a month for 3 years in hosting and even a one-time $5,000 a month for a year offer for select startups.

Oh and there will be pizza too!
